AT AN AFFORDABLE PRICE

CLASSIC COFFERS • 877.297.2228 • WWW.CLASSICCOFFERS.COM

OUR WOOD CEILING

gives you:

- The **beauty** of a classic, handcrafted ceiling.
- A **cost effective** alternative to custom millwork.
- **Access** to utilities and wiring in the ceiling.
- **Pre-finished components**, that eliminate job site mess.
- **Quick installation** without the use of special tools.

Design FLEXIBILITY:

Standard product is solid oak available in **three** colors.

Natural

Autumn

Cordovan

Custom colors, wood species and designs available to match any decor.

Our system compensates for out-of-square walls.

The wood ceiling gives an **Office, Den, Restaurant, Home Theater, Finished Basement or Formal Living Room** an elegant finish. Available in Class "A" fire rated finish.

The sophistication of custom millwork combined with the ease and adjustability of a suspension ceiling – that's the advantage of our system.

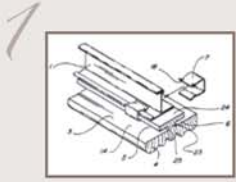

If you are a designer, builder or do-it-yourself homeowner looking for a way to enhance the beauty and warmth of that special room in your building, office or home, our patented wood ceiling is made for you.

DESIGN FEATURES

- 1 Our Wood Ceiling components clip onto a standard 2' x 2' 15/16" metal suspension grid and panels are easily removed for utility access.
- 2 Installation is quick and easy with minimal mess and down time reducing cost up to 70% of conventional fixed wood ceilings.
- 3 Installed system is designed to expand and contract with changing room conditions and will not crack or separate.

HOW THE SYSTEM WORKS

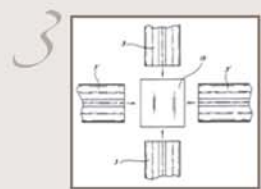

The wood ceiling clips onto a standard 2' by 2' 15/16" suspended metal T-grid system.

Unique clip design allows each trim piece to be easily clipped into place.

T-Rail reveal **molding is clipped** on to the grid.

Rosette block provides excellent joints at each intersection and yet **allows the entire system to easily**

flex with changing environmental conditions.

Entire **grid is covered** with wood trim.

Coffered wood panel fits into opening and can be removed for **access to the ceiling**.

Perimeter crown and **pre-mitered corners** finish off the perimeter of the room.

Voila!
Your room now has the **beauty and warmth** of what appears to be an expensive, custom milled hardwood ceiling.

U.S. Patent No. 5,239,801

CORPORATE LOGO VENT PANELS

Wood panels can also be personalized with logos, lettering, or other designs.

The acoustics of this ceiling and access above make this perfect for home theaters and board rooms.
